FINAL PROJECT · MOBILE APP

Glow-Up

A fitness and nutrition app for university students. It brings workouts, meal logging and progress tracking into one dark, focused interface with four tabs: Home, Train, Fuel and Glow.

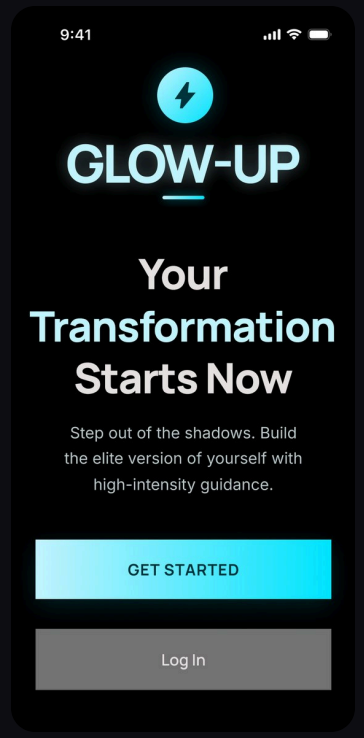

ROLE	Solo designer: flows, UI, prototype
TOOLS	Figma, AI-assisted design (required by the brief)
SCOPE	9 connected mobile screens

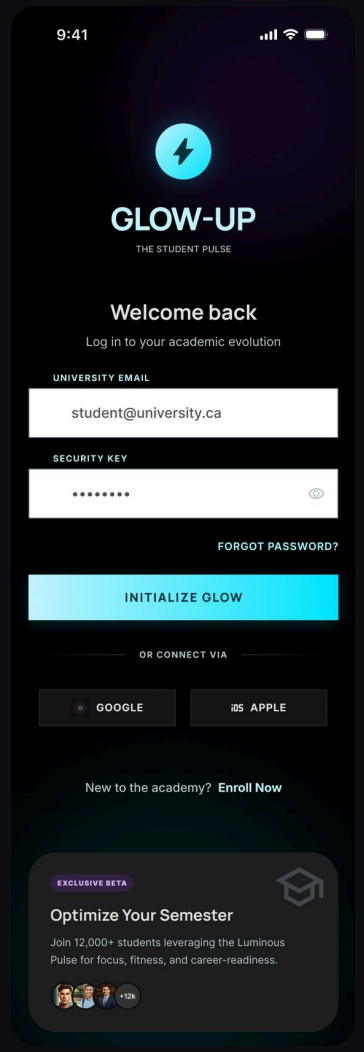

- Home dashboard with goal ring, streak and calories
- Workout library, live timer, routine builder
- Meal log with macro balance
- Profile with milestones and consistency heatmap

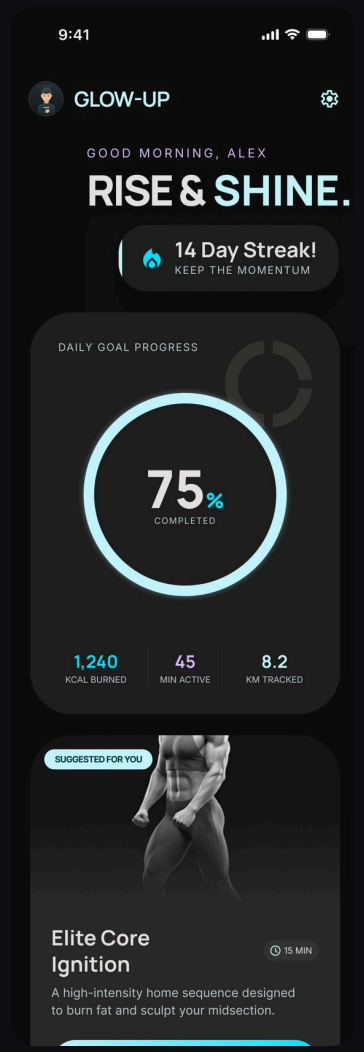

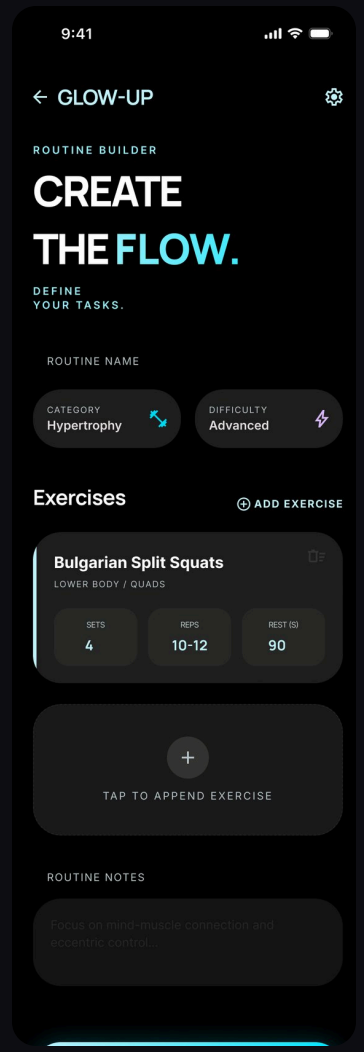

Glow-Up screens

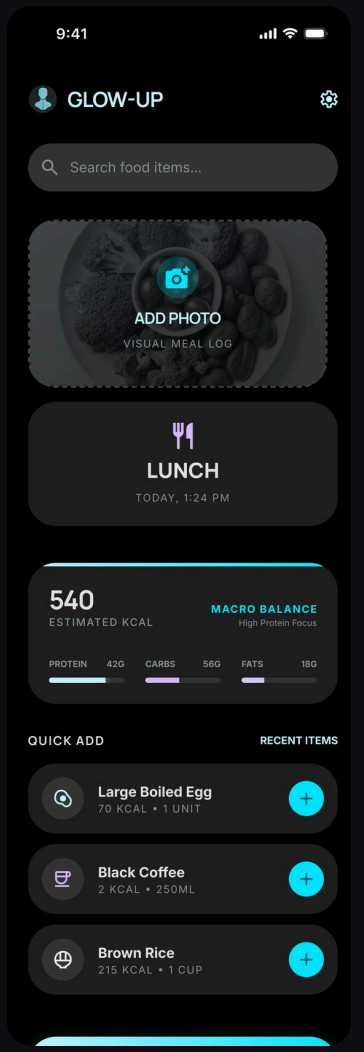

From onboarding to the session summary: one type scale, one cyan accent and one card style.

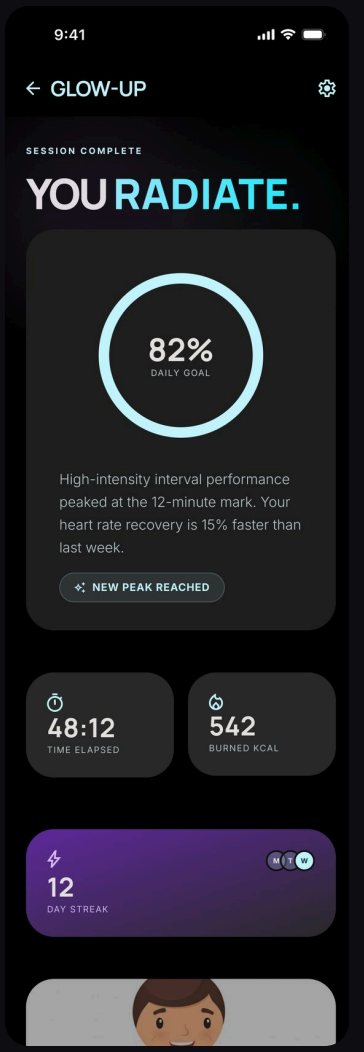

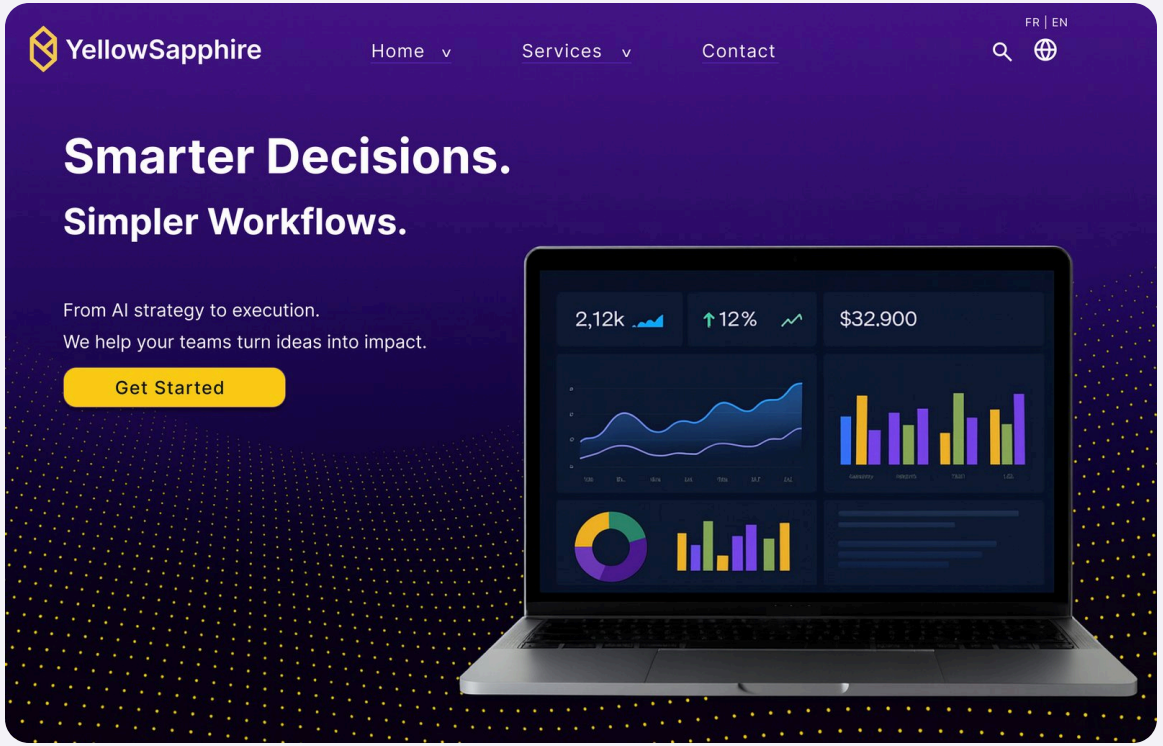

SCHOOL PROJECT · WEBSITE

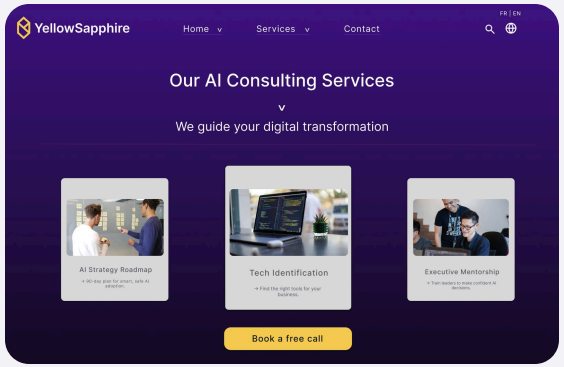

Yellow-Sapphire

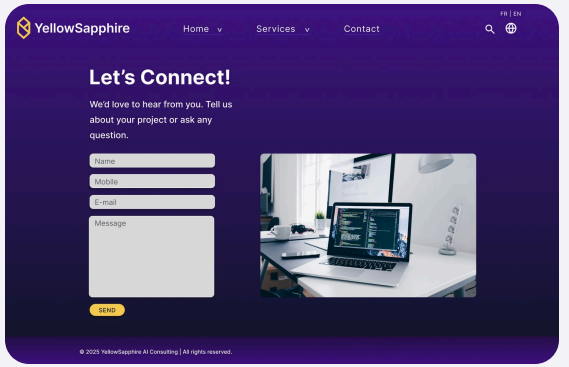

A website for a fictional AI consulting firm: a deep violet base, gold for calls to action, and a French/English switch for a Canadian audience.

ROLE	Web UI design, clickable prototype
TOOLS	Figma
PAGES	Home, Services, Contact

- One clear value line and one primary action in the hero
- Services as three scannable cards
- Short contact form with supporting imagery

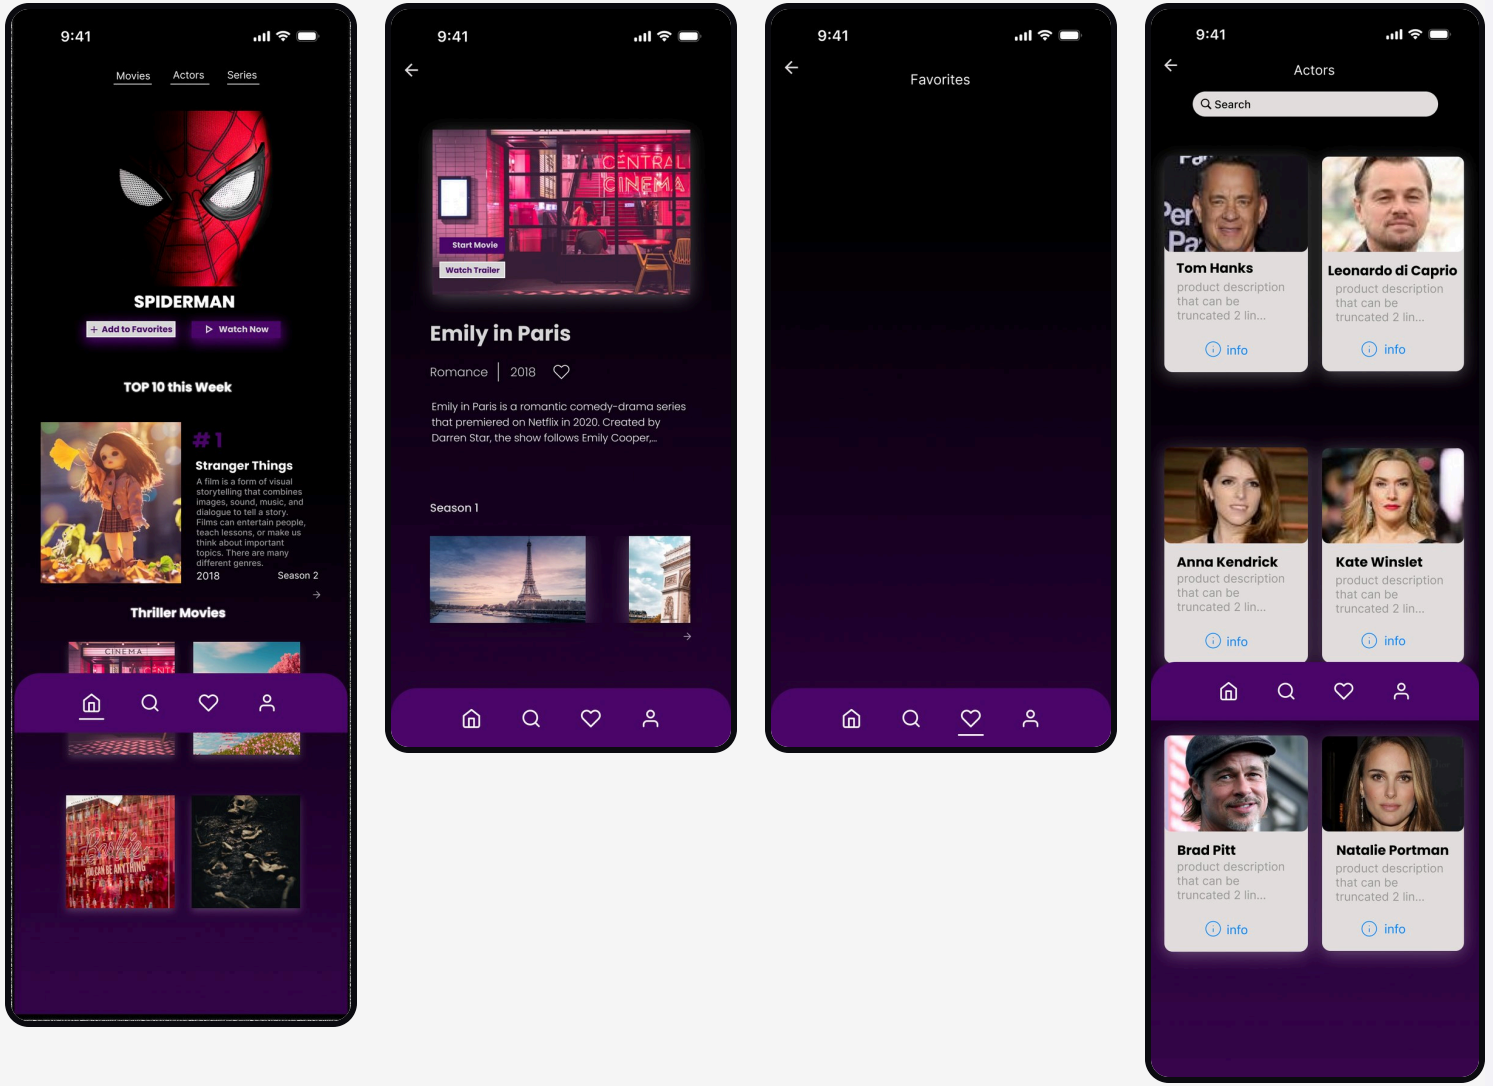

MIDTERM · MOBILE APP

Streaming app concept

A mobile app for finding movies and series: a featured title, a "Top 10 this week" list, a detail page, favourites and an actor search as a card grid.

COURSE	MAD9020, Algonquin College
TOOLS	Figma, reusable components
SCOPE	4 screens + bottom navigation
